

COMPLIANCEQUEST

Quality • Safety • Compliance • Collaboration

Compliance & Safety Management Made Easy

**Get out of the classroom and
back to on-site strategies.**

LearnAboutSafety by ComplianceQuest is an all-in-one safety management software. The LearnAboutSafety platform features a spectrum of safety management tools aimed at supporting safety compliance.

It was designed as a way to manage administration, communication, registration, enrollment, certification, and reporting to amplify your training programs in a way that drives your bottom line. Plus, it features an E-Learning portal, a course builder, training videos, quizzes, training downloads, streamlined reporting and recordkeeping, and much more.

Whether you're in construction, warehouse, manufacturing, healthcare, education, or any other industry, LearnAboutSafety is your ideal software solution for safety and compliance management.

An Introduction to LearnAboutSafety

Getting started with LearnAboutSafety means gaining access to your very own safety management software portal with a full suite of safety management tools at your fingertips, accessible by your own dashboard.

What is LearnAboutSafety?

LearnAboutSafety is an all-in-one safety management software accessible via your own username and password. Upon logging into the portal, you're greeted by your very own dashboard where you can navigate a plethora of key tools that help support your organization in its critical safety objectives.

LearnAboutSafety eliminates the need for monotonous manual recording, tracking, and reporting of key safety initiatives such as recordkeeping and training.

Why LearnAboutSafety?

Your role is most successful when you're in the field providing personal interaction with employees to ensure their safety.

Unfortunately, traditional means of safety management make that nearly impossible, between the paperwork that accompanies incident reports, training, and more. LearnAboutSafety automates all the aspects of safety management that do not require the engagement of humans. Get out of the office or classroom, and back in the field doing that aspect of your career that you love.

You Can Make it Your Own

One of the key features of the LearnAboutSafety portal is that you can use your own logo for clean, consistent branding across your organization.

Add Users and Groups

Every location and department has its own unique safety management needs, which is why LearnAboutSafety allows you to organize your software portal by location, departments, job type, and more. Now, managers, supervisors, or other key stakeholders can view the critical safety and compliance indicators of any department.

Customize Notifications

Stay in the know by customizing your notification settings so you get an email when key safety objectives are completed. With LearnAboutSafety, you can stop manually tracking and reporting key metrics— it's all stored at your fingertips and accessible at the touch of a button.

How LearnAboutSafety Elevates Safety Performance

We built LearnAboutSafety to be a full-spectrum support system for key safety and compliance objectives. It offloads a lot of the brunt-work to automation, so that you can focus on big-picture thinking.

Store and Search Key Reports

Need to quickly pull a specific report or record? No problem. LearnAboutSafety means never having to manually store and track key safety reports ever again. If you want to access and analyze key reports to refocus safety efforts and initiatives, simply populate key reports in the reporting feature.

Share Important Information With Key Stakeholders

A business is a well-oiled machine, which means there are likely a few stakeholders involved in the safety and compliance management of an organization. LearnAboutSafety allows key stakeholders to each have their own login and password into the portal to access key data.

LearnAboutSafety makes presenting data to stakeholders a breeze. No more creating and emailing spreadsheets or reports.

Easily Create, Administer and Store Records of Safety Training

LearnAboutSafety also provides you with your own tools specifically designed to fully support your company's safety training, no matter your methods. Whether you build your own courses, or use online courses or classroom training (or all of the above!), LearnAboutSafety provides you with the course, course builder, safety content, or training materials you need for over 1,000 courses.

E-Learning in LearnAboutSafety

E-learning is a blanket term for any type of learning or training done 100% online. If you've ever taken an online training course, you've participated in eLearning.

LearnAboutSafety takes e-learning to the next level when it comes to safety training. In your LearnAboutSafety portal, you have a complete e-Learning LMS that can host and manage any type of training administration

Administers Interactive Training

Notable attributes of LearnAboutSafety courses is that the training is interactive, driving engagement and retention through one-on-one employee training experiences. This helps nurture a positive safety culture because it allows the user to learn at their own pace.

And because they're hosted online, they can be accessed by any device that has WiFi connection capabilities such as a phone or tablet, ideal for even the most diverse work settings. If an employee is absent on the day of training, they can log into their training dashboard and take their training at their earliest convenience and still be accounted for.

Let's not forget those safety refreshers! The "refresher" training or safety shorts in LearnAboutSafety can be used to brush up specific topics before diving into the workday, or the toolbox resources can be used for tailgate or toolbox talks before diving into the work-days activities.

Assists with Classroom Training

Do a lot of instructor-led training with manual quizzes? No problem. SafetySoft arms instructors with a safety training video, downloadable handouts, and quizzes, making your training process (no matter your methods) more dynamic, efficient, engaging, and...the big one...effective.

Records and Stores Test Scores

Testing shows us that employees have retained the training course knowledge, which is the point of training.

Every LearnAboutSafety course, either e-learning or online streaming, comes with a test at the end to be sure employees have retained the valuable safety knowledge presented. Test results are then stored for easy reporting and recordkeeping.

Build and Upload Your Own Courses

LearnAboutSafety allows you to build your own courses or upload your existing company-specific training courses! Upload SCORM courses into the LearnAboutSafety LMS, or build your own in the Course Builder feature, both of which are right inside your LearnAboutSafety portal.

What It's Like to Work With Us

At ComplianceQuest, safety is our top concern. We pride ourselves on our high renewal rates, suggesting that we're driving our mission of creating safer workplaces!

Customer Support

And since you help drive our mission forward, we ensure that we provide unparalleled customer support with video conferencing, phone, or chat right here in the U.S.

"The customer service at ComplianceQuest is great. They always respond quickly. They take the time to 'teach' instead of just fixing a problem or correcting an issue. The employees seem to like the reminder emails so they know what they have to complete and when it needs completed. I am very pleased we made the investment. It has made my job not only easier but more accurate." – **Rochelle, Regal Service**

No Setup Fees!

Despite common belief, getting set up with EHS software is relatively easy, and in most cases, pretty cost-effective.

LearnAboutSafety takes it a step further by making it completely free!

As soon as you're ready to take your company's safety to new heights, our development team will begin the setup process, which consists of inputting your company information into its hosting platform, importing users, giving you an introductory demo, etc.

The whole process only takes about 24 hours, with little to no involvement on your end, and we're here to guide you with your very own support specialist!

Security

We believe in safety not just for employees, but for your information as well.

With LearnAboutSafety, you can rest assured that your most sensitive information is protected from cybersecurity threats. We do this by employing a completely encrypted SCORM cloud security infrastructure that was designed for your peace of mind.

Who We Serve

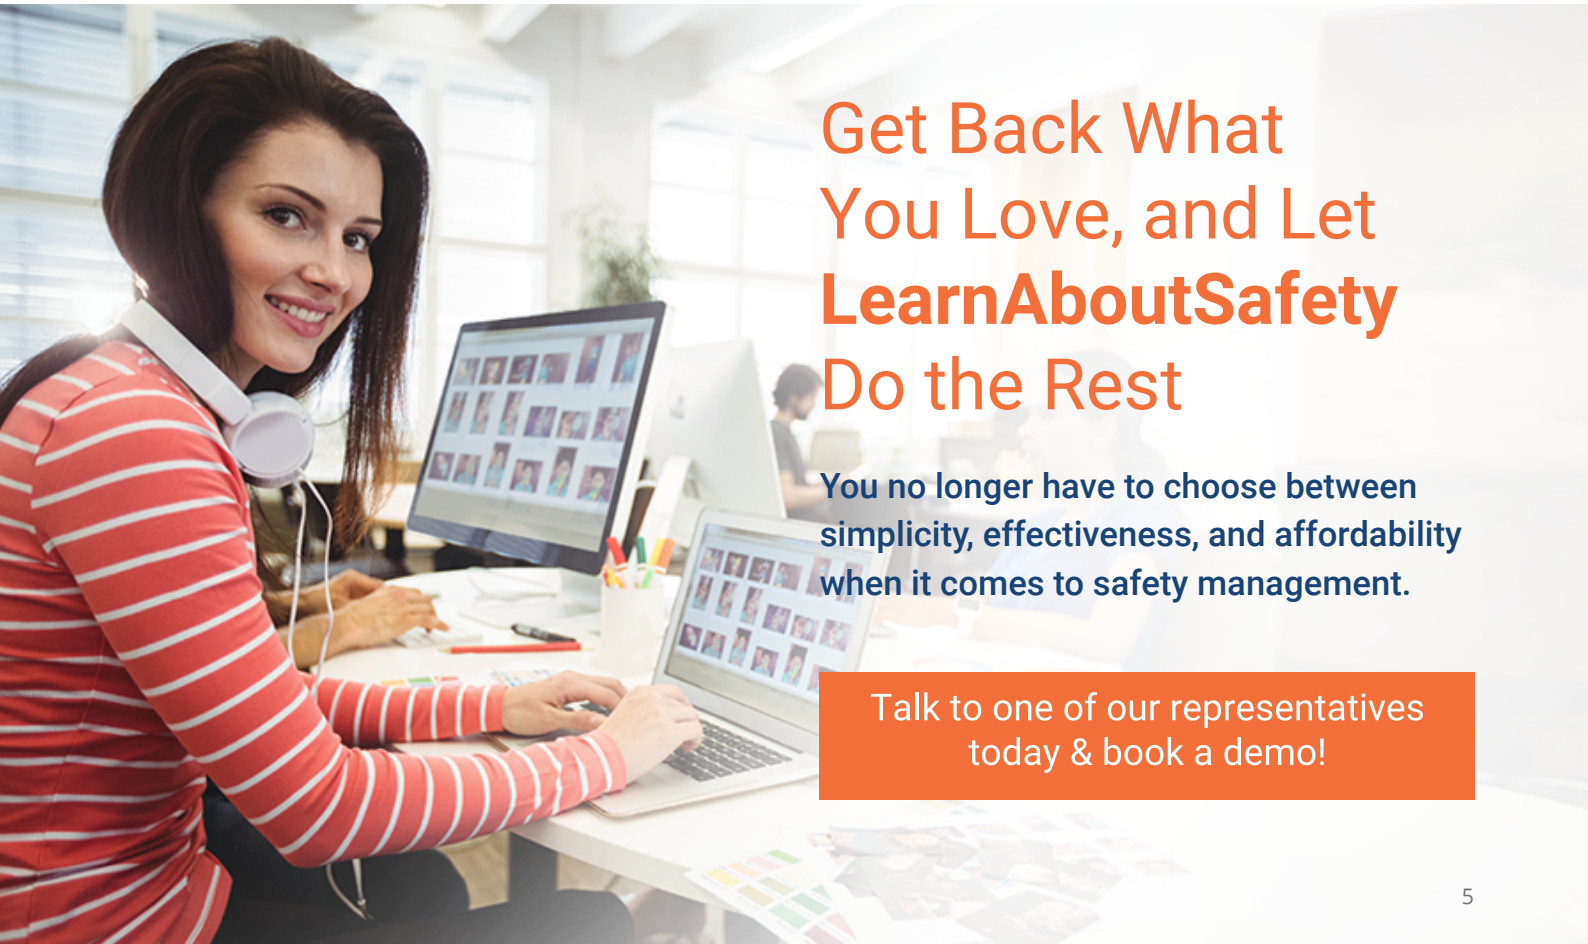

We serve anyone in charge of managing employee safety including:

- Safety Professionals
- Consultants
- Insurance Providers
- Resellers (Enterprise content available)

If you're ready to chat with a friendly face about what EHS training software can do for you, contact one of our sales reps by simply chatting with us on our site, or by calling our knowledgeable training development representatives.

Key Takeaways
