

HVAC Area Safety Audit Checklist for Pharmaceutical Companies

This HVAC area safety audit checklist is designed to assist in the thorough inspection of the HVAC area of a pharmaceutical company. It is a powerful tool used to assist drug manufacturers in performing systematic safety audits across the HVAC area.

SL. NO.	Questions	Yes	No	Comments
1	Is SOP (Standard Operating Procedures) for the operation of the HVAC system available in the area?			
2	Are all areas around the air handling unit (AHU) clean?			
3	Has the air handling unit (AHU) operation log been updated with the latest data?			
4	Is PM (Permit Management) of air handling units done as per the scheduled time?			
5	Are all filter cleaning and monitoring records available and maintained?			
6	Has the limit of DP across various filters of air handling unit (AHU) been displayed?			
7	Are all certificates and validation documents maintained properly?			
8	Is validation of the HVAC system carried out as per specified frequency?			
9	Has the filter cleaning and monitoring record of the dust collector been maintained and updated regularly?			
10	Are all daily monitoring records of the production area and other critical areas maintained properly?			
11	Is the cooling tower cleaning schedule available?			
12	Are all cooling tower cleaning records updated?			
13	Has the chiller operation log been regularly updated?			
14	Is the cleaning log sheet for the RO membrane up to date?			
15	Are all training records of personnel available?			
16	Are all thermostats properly calibrated?			
17	Are all ducts sealed properly?			
18	Others			

If you are looking for a solution to manage your pharmaceutical company's workers' safety, health, and well-being, you have come to the right place. The ComplianceQuest safety solution suite can be effortlessly integrated into your organization's procedures by adding additional modules, creating customized workflows and processes, and smoothly automating repetitive tasks. It is capable of dealing with all the complexities associated with your safety processes and systems.

Furthermore, these checklists can be digitized and imported directly into the ComplianceQuest safety management module.
