

Hazard Communication Checklist for Warehouse Safety as per OSHA Guidelines

When hazard communication is implemented effectively, it has significant benefits for both the employer and the workers in the warehouse. The purpose of this checklist is to ensure that the organization mitigates the hazards within a warehouse of all chemicals produced or imported are classified, and that information concerning the classified hazards is transmitted to employers and employees.

Please tick				
1.	Are all hazardous materials containers properly labeled, indicating the chemical's identity, the manufacturer's name and address, and appropriate hazard warnings?	Y	N	N/A
2.	Is there an updated list of hazardous chemicals?	Y	N	N/A
3.	Does the facility have a written program that covers hazard determination, including Material Safety Data Sheets (MSDSs), labeling and training?	Y	N	N/A
4.	Is there a system to check that each incoming chemical is accompanied by a MSDS?	Y	N	N/A
5.	Are all employees trained in the requirements of the hazard communication standard, the chemical hazards to which they are exposed, how to read and understand a MSDS and chemical labels, and on what precautions to take to prevent exposure?	Y	N	N/A
6.	Are all employee trainings documented?	Y	N	N/A
7.	Are all outside contractors given a complete list of chemical products, hazards and precautions?	Y	N	N/A
8.	Have procedures been established to maintain and evaluate the effectiveness of the current program?	Y	N	N/A
9.	Do employees use proper personal protective equipment when handling chemicals?	Y	N	N/A
10.	Are all chemicals stored according to the manufacturer's recommendations and local or national fire codes?	Y	N	N/A

Use ComplianceQuest's safety solution suite to ensure compliance with hazard communication safety standards and mitigate risks. Our easy-to-use solution enables all organizations - from global leaders to local businesses - to track, manage, and comply with environmental, health, and safety regulations.
