# BatchQuest

Electronic Batch Record Solution Suite

## Right First Time Batch Execution.

Most EBR/MES systems digitize the batch record. BatchQuest connects execution, quality, traceability, and release into one operational system. It replaces paper records, spreadsheets, and disconnected systems with guided, real time digital batch execution eliminating errors and accelerating batch release. Each step, parameter, approval, and deviation is captured as work happens, so batches are confidently released and always audit ready.

Batch # 3.31.26Rev3 Batch Title 5mL Syringe Production Product Name 5mL Syringe Units: 20

1.1 Syringe Assembly Show Exceptions  + Create NC

1.1.1 Ensure oven temperature is 300 F

+ New Entry

**ENTRIES**

Entry 3: Samarth Gandhi: Added 290 degrees Verify 10-08-2025 9:12 AM

**Machine Equipment** Measure Value

Machine Equipment	Measure Value
Oven	290

Collaboration Due Date: 2025-12-19 Min: 290 - Max: 300

**CORRECTIONS**

Old Value	New Value	Justification	Jan Doe
300	295	I put in the wrong value before	10-08-2025 12:55 PM

**COMMENTS**

Incorrect value entered initially. Verified oven display and corrected temperature to 295°C. No product impact. Jan Doe 10-08-2025 12:55 PM

Performed By: Jan Doe 10-08-2025 1:14 PM Verified By: Jan Doe 10-08-2025 1:25 PM

Entry 2: Jan Doe: Added 290 degrees 10-08-2025 9:15 AM

Entry 1: Jan Doe: Added 290 degrees 10-08-2025 9:14 AM

1.1.2 Perform line clearance

Units: Remaining: 20 + Completed: 0 + Rejected: 0 Total: 20

Finish this step

Ensure compliance. Boost yield. Streamline every batch.

BatchQuest is an Electronic Batch Records Solution that transforms how batches are designed, executed, reviewed, and released - eliminating paper, reducing manual effort, and ensuring audit-ready traceability by design.

# One System for the Complete Batch Lifecycle

BatchQuest digitizes and brings every stage of the batch production lifecycle together, so manufacturers can ensure accuracy, traceability, and compliance from process definition through batch closing.

03

# How BatchQuest Works

## Digitizing the Entire Batch Lifecycle

### Define Process

#### Set up operations with accurate, validated instructions

- **Digital Batch Templates**

Create standardized and approved operations with pre-configured manufacturing process workflows.

- **No-Code Configuration**

Build and update batch definitions quickly without custom development.

- **Integrated Product and Equipment Data**

Bring product data, specifications, engineering changes and required equipment to use directly into production.

- **Document and Change Control Integration**

Ensure operators always work from the correct, approved version of SOPs & parameters.

### Build Master Batch

#### Create ready to execute batch records

- **Bill of Materials Integration**

Automatically pull the correct Bill of Materials (BOM) into each batch.

- **Template Configuration**

Add items such as weighing, sampling, dispensing, packaging through easy configuration.

- **Automated Readiness Checks**

Validate that materials, equipment, and personnel meet all pre-execution requirements.

- **One-Click EBR Generation**

Instantly create executed batch records from approved templates.

## Execute

## Review & Release

### Prevent errors during execution

- **In-Process Verification**

Enforce validated steps with automatic checks for parameters, ranges, & decision logic.

- **Training Enforcement at Execution**

Prevent execution of steps unless operator training & authorization requirements are met.

- **Barcode Scanning & Evidence Capture**

Track materials with lot/serial scanning & attach images, videos, or documents as proof.

- **Multi-Device Access**

Execute batches on desktop, tablet, or mobile - on the shop floor or remotely.

### Faster release with Review-by-Exception

- **Review-by-Exception**

QA reviews only the flagged steps, reducing release time dramatically.

- **Integrated Quality Management (QMS)**

Link execution to non-conformance, training, and change control workflows.

- **Seamless System Integrations**

Connect easily with ERP, MES, and enterprise systems through CQ's integration framework.

- **21 CFR Part 11 Compliance**

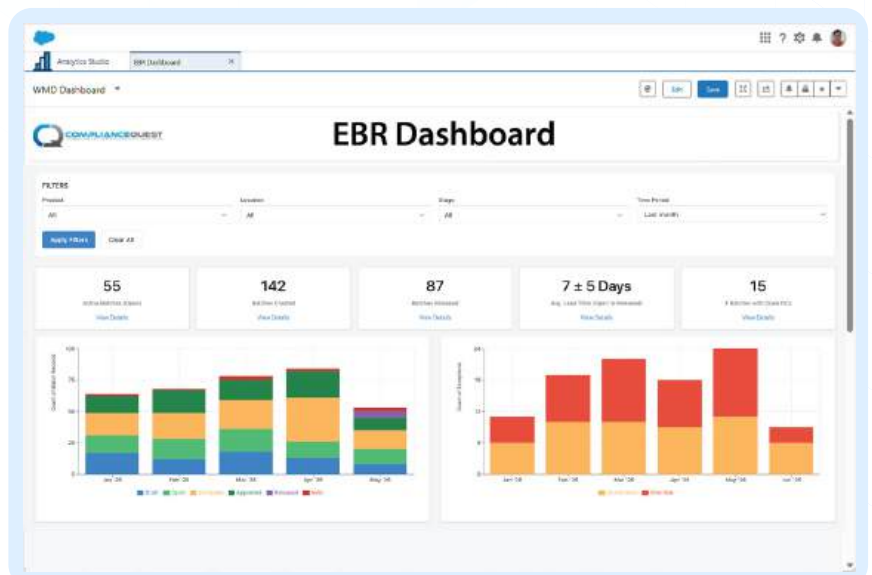

Maintain secure, validated electronic records with full audit trails & e-signatures.

- **Audit-Ready Reports**

Generate eDHRs/Batch Records instantly for inspections or customer requests.

# Turn Execution Data into Insight

Once a batch is closed, BatchQuest turns real-time execution data into dashboards and trends that help teams reduce deviations, improve throughput, and standardize best practices across sites.

# Drive Measurable Batch Outcomes

 Prevent Execution Errors	 Enforce Process Control	 Accelerate Review & Release
 Real-Time Execution Visibility	 End-to-End Traceability	 Audit-Ready Records

## Proven Impact, Faster ROI

 <b>15–40%</b> Reduction in Deviations	 <b>50–80%</b> Faster Batch Review	 <b>50–90%</b> Reduction in QA Review Effort
 <b>20–60%</b> Faster Product Release	 <b>10–25%</b> Improvement in Manufacturing Productivity	 <b>15–40%</b> Improvement in Right-First-Time Execution
 <b>35–70%</b> Shorter Batch Release Cycles	 <b>80–100%</b> Reduction in Manual Errors	 <b>20–50%</b> Improvement in Training & Compliance Enforcement

\*Based on aggregated industry benchmarks, analyst insights, and results observed across EBR implementations.

# The ComplianceQuest Difference

## Next Gen All-in-one Platform

Integrated PLM, QMS, EBR, EHS and SRM/SQM for end-to-end quality across the product lifecycle

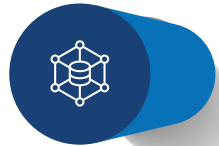

## High Configurability

Freedom to configure the system to your unique business needs without being dependent on us

## Unified Data Model

Seamless data integration for better decision-making and process optimization

## Extensive Language Support

Offers multilingual support for global collaboration and adoption

## Hyper Automation & AI

Automation and AI-driven analytics for increased efficiency and data-driven decisions

## User-Friendly Persona-Based UI

Offers Intuitive UI for easy navigation, improved user experience and robust mobile app

## About ComplianceQuest

Transform to a fully connected business with a next-generation AI-powered Product Lifecycle, Quality, Batch Record, Safety, and Supplier Management platform, built on Salesforce. Our connected suite of solutions helps businesses of all sizes increase quality, safety and efficiency as they bring their products from concept to customer success. Our intelligent data-driven platform comes with best-in-class integrated processes to mitigate risks, protecting your employees, suppliers and brand reputation, and to increase innovation, compliance, profit and customer loyalty. ComplianceQuest is pre-validated and easy to implement, use, and maintain, allowing for streamlined communication and collaboration across the product value chain.
